Sport Vision Center Opens

Sport Sciences International's president – Kevin Honsberger BSc.PT. is proud to announce the opening of their Sports Vision Assessment and Training Centre in Markham Ontario.

Sport Sciences International has always been at the vanguard of the development of sports performance. It's commitment to tracking clinical experiences to continually update their training and treatment protocols has taken the next step in ensuring optimal performance by opening their sport vision training centre.

Sound athletic decisions are a direct reflection of the quality of the visual input. It is not surprising to note that vision research across a multitude of sports continues to prove that the best athletes have the best eyes.

As we understand and commit to training our bodies the same now applies to our eyes. The research is compelling and the results are fantastic. “ We can no longer ignore the value of proper vision, its impact on performance and the role of training” Honsberger states.

Sport Vision assessment and training is available across a wide range of sports. Feel free to contact the clinic at 905-940-2627 or Kevin personally at honsphysio@rogers.com to arrange an information session.
